Client Profile

Our client is a global supplier of technology and services with primary focus on IoT.

Our client offers IoT-based smart solutions for homes, cities, mobility and manufacturing.

They use their expertise in sensor technology, software and services, and their own IoT cloud to offer connected, cross-domain solutions to their customers.

Business Scenario

Being into the IT services and solutions business, quality assurance is one of the most critical aspects of software delivery. Considering this fact, our client wanted to implement a robust test automation tool for their website to automate testing of design, UI components, validate database and web services. Our client already spent mission-critical time on manually testing the UI consistency and business flow validation. They even executed large datasets multiple times without much success. As a result, our client wanted to automate these test cycles to increase the functional test coverage and reduce regression testing lifecycle.

Solution

Our client trusted TestingWhiz for web UI, web services and data-driven testing due to its efficiency and proven track record for test automation. TestingWhiz helped to automate:

End-to-end regression testing of the system for UI, functional, database and APIs

Database testing ensuring data integrity, accuracy and to map data with corresponding fields in database

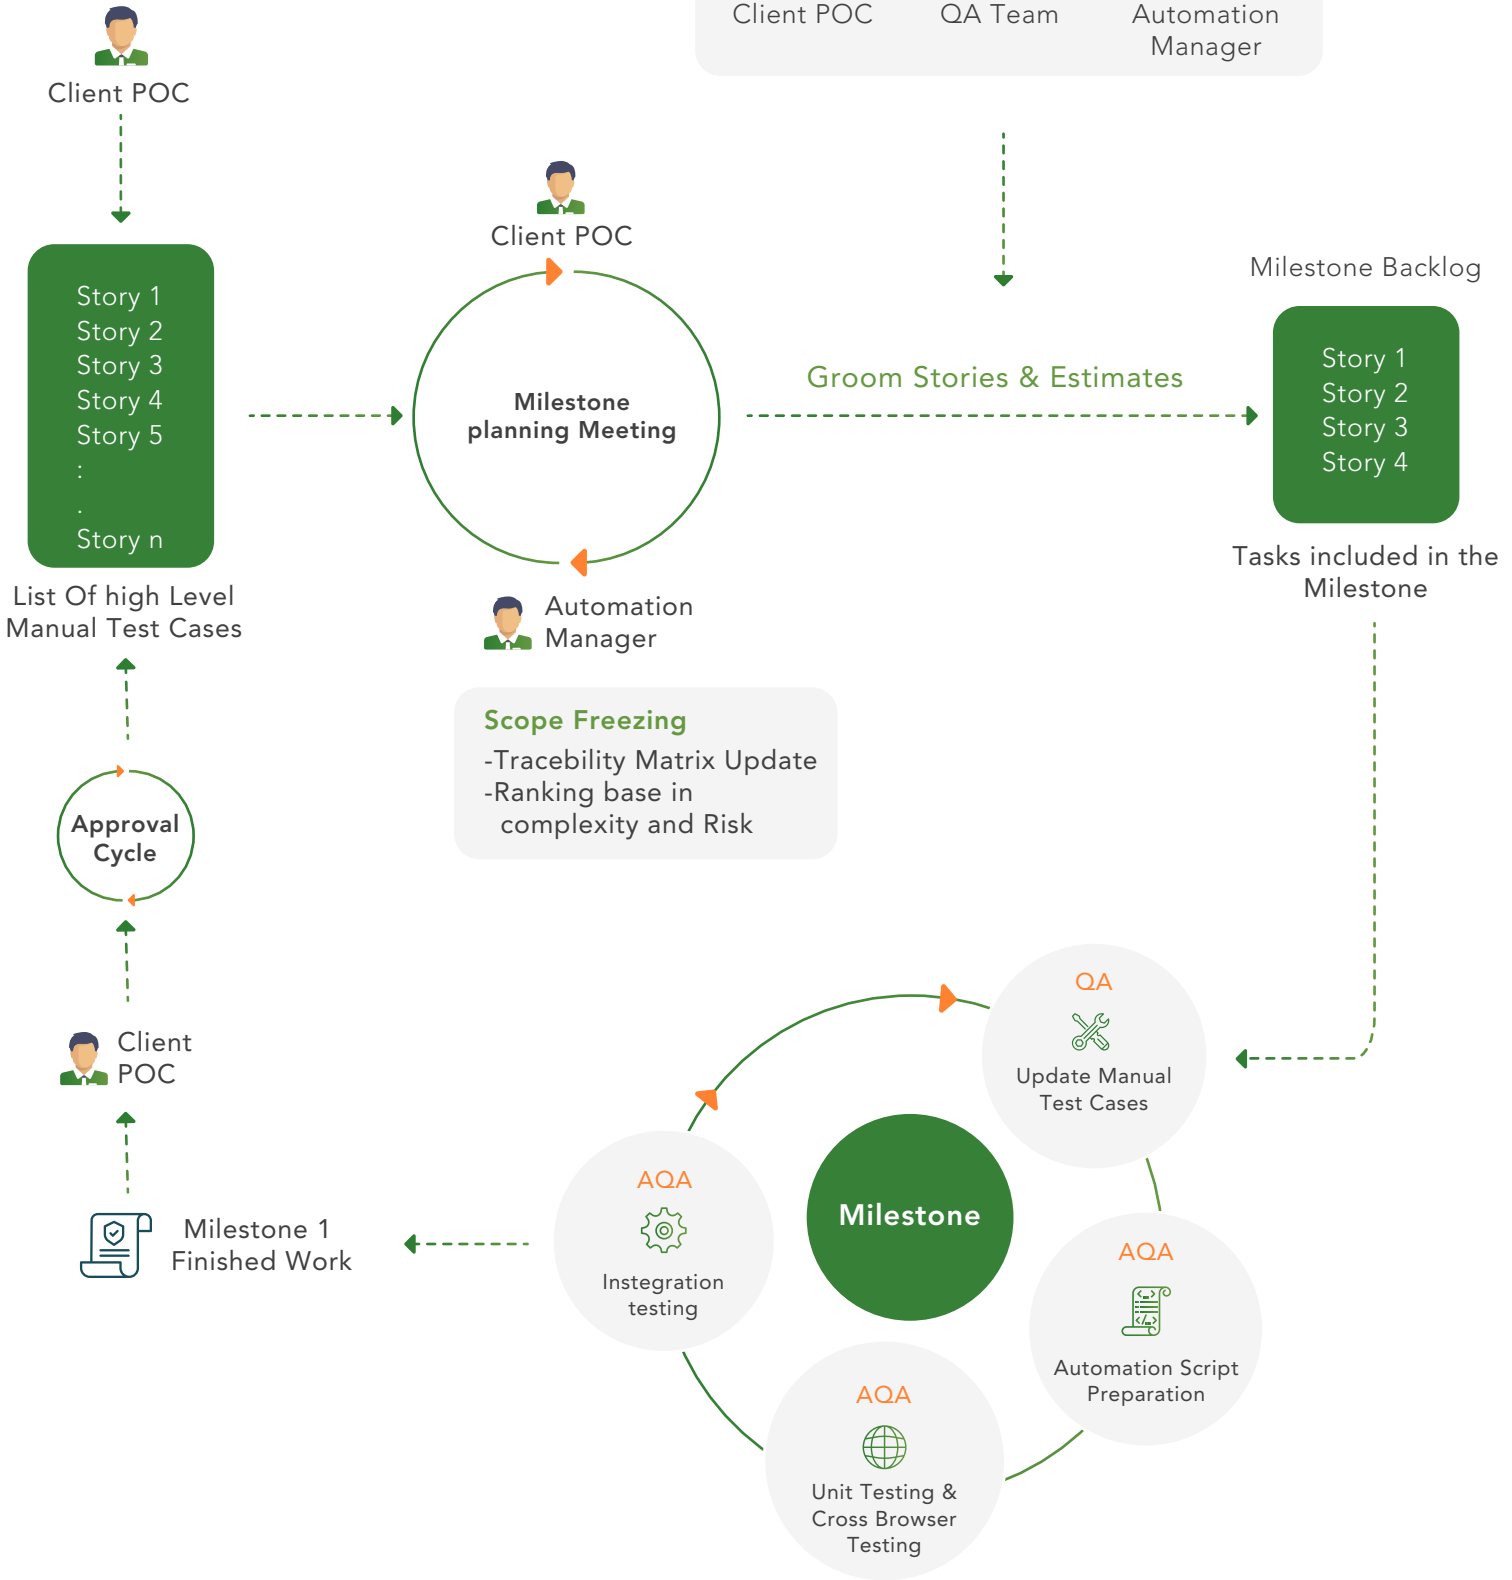

Web services testing for business flow validation

Web UI testing for design consistency across different browsers, platforms and devices

Our Approach

Success

TestingWhiz enabled automation of more than **800** test cases with **70%** reduction in the regression testing lifecycle.

About TestingWhiz

TestingWhiz is a Codeless Test Automation Solution created for Agile Teams. It is built with a commitment in mind that any tester without having programming skills can automate complex test cases and save total cost of Automation.

TestingWhiz uses Cygnet's proprietary technology combined with Selenium to bring codeless approach to App Testing which is a unique proposition. It offers 360-degrees automation with a full circle support on Web, Mobile, Web Services, Database, Cloud and Big Data Testing.
