- Added support for recording user actions for HTTPS sites in external recorder
- Added support for headless testing in Jenkins execution

Improvements and Enhancements

- Recording enhancement for iFrames in Internal recorder
- Enhanced support for windows authentication for SQL Server
- Allow Variable and Data table reference in Target File field of Database->Fetch Command
- Allow string > substring using variables and data table reference
- Handle Async. page load for check image operation
- Capture screenshot on condition failure (condition evaluated fail) made optional with configuration setting
- Improved performance for execution

Bug Fixes

- Perform -> Set variable not working with data table reference in specific cases
- Sample Script - Basic element fails in Chrome browser with latest chrome browser
- Get -> Drop Down Value is not working for specific cases
- valid cloud credentials ends up with incorrect credentials message
- Executing Block inside if & else if ends up with a log incompatible operand types
- When conditional script steps fails, then also result of script execution is shown as Pass
- Wait->For Element command does not works as expected in Firefox
- Does not take the URL referenced as \${BASEURL} with the forked test cases
