STARTING TESTING WHIZ-GRID

Use TestingWhiz as a server and execute tests on remote desktops without installing TestingWhiz on those remote machines. From a central server console, configure the remote machines and the browsers on which to run tests.

> Starting a Hub

To start a hub, attach node with default parameters

Go to Tools > Start Server

Tools	Scheduler	Support	
Start Server			
-			

Check whether hub is stated or not by http://{IPAddress}:4444/grid/console

If hub is connected successfully, then Grid console will appear

Starting additional Node

Execute a Node-manager\launch.jar

Ö	TestingWhiz Node		– 🗆 X
	Server IP Server Port Number	127.0.0.1 4444	Node
	#	Browser	Instances
	1	Mozilla Firefox	1
	1	Internet Explorer	1
	1	Google Chrome	1
	1	MicrosoftEdge	1
	2	Headless Execution	1
		Connect Exit	

Server IP: - IP Address

Server port Number: - Port

Browser Configuration: -

- #: Browser Usability flag
- **Browser:** The name of the browser being used

Instances: -Maximum number of instances to allow to connect to grid

Connect a TestingWhiz Node and then it will show a success message.

Message		×
i	Connected Successfully.	
	ОК
