TESTINGWHIZ
by Cygnet Infotech

The US state government executive office automated 40% of their total test scenarios

Client Profile

The state government executive office handles operations like registration of businesses, regulations of notaries, and much more.

COUNTRY
USA

DOMAIN
GOVERNMENT ADMINISTRATION

Challenge

- Lack of a centralized testing platform to test multiple testing scenarios resulting in fragmented data and inaccurate test results

- Excessive time to achieve the regression testing cycle within the stipulated deadlines

- The users were largely non-technical and finding it difficult to carry out regression testing with their existing testing tool

Solution

- TestingWhiz offered a non-technical tester-friendly test automation framework

- TesthingWhiz framework got seamlessly integrated with their existing tools, which helped them run multiple test case scenarios from a single centralized platform

- The client reduces their regression suite cycle and seamlessly executes new product releases

Outcomes

- TestingWhiz brought an easy-to-implement one-stop solution to all their automation testing needs – Web apps, APIs and Databases

About Cygnet Infotech

Established in 2000, Cygnet Infotech works with clients across 35 countries and has a strong team of over 1000 employees. Cygnet Infotech's offerings range from IT Services, Technology Products, and Tax Technology solutions. Aligned with its vision of providing technology enabled business solutions, Cygnet Infotech delivers end-to-end solutions for clients' most pressing business needs.

TestingWhiz by Cygnet Infotech is an easy, intuitive Test Automation Solution. It is based on the Flexible Automation Scripting Technology (FAST) that uses intelligent and reusable recording techniques like Keyword Driven Testing, Data Driven Testing, MS Excel Programming, Object Based Inputs and Java Scripting to design and execute test cases. It integrates with popular tools, frameworks, databases, and platforms to ensure seamless automation and test case execution across different environments and conditions.
