

Release Notes Version 8.3.0

New Features

1. **Label-based Execution:** Allow users to have more control on setting parameters for testcase execution.
 2. **Import Postman Collections:** A powerful integration enabling users to swiftly import collections from Postman. Users no longer need to switch between the tools.
 3. **SMS Command:** Allow users to capture text messages from any given Twilio number.
 4. **Extract Regex Command:** Allow users to extract string using java expression.
 5. **Error Handling:** Users can now choose to continue execution even when the test step has failed.
-
